

## Belly Board BD05-00

The IMPACT Belly Board is specifically designed to enhance the reproducibility of the patient's prone position, making it ideal for pelvic malignancy treatments and abdominal radiotherapy. It is compatible with both flat and prone cushions to ensure optimal patient comfort. The board is anatomically contoured for abdominal decompression, enhancing comfort during prolonged prone positioning and helping minimize radiation exposure to healthy tissues.

### Salient features:

- ✓ Lightweight and Ergonomic Design
- ✓ Improved Access to Treatment Area
- ✓ Indexing Compatibility
