

Prone Headrest PHR25-00

IMPACT headrests provide the utmost support, accuracy, and repositioning to the head and neck region. The specially designed shape of Impact headrests are compatible with the patient head allowing complete support and comfort at every stage of treatment. Panacea offers a prone headrest to support prone positioning needs.

The Prone Headrest is specifically designed to provide optimal support and stability for patients positioned face-down (prone) during radiotherapy treatments. It facilitates precise alignment of the head and neck while maintaining patient comfort, making it ideal for spine, posterior brain, or craniospinal irradiation procedures. The IMPACT Prone headrest is made of carbon fibre material delivers stability and desired reproducibility in the prone position with normal breathing provision.
