

Shoulder retractor CSR27-00

The IMPACT Shoulder Retractor is ideal for head, neck, and thoracic radiotherapy, providing clear exposure of the treatment area while maintaining consistent shoulder positioning across treatment fractions. Constructed from durable carbon fiber, it features a large footboard and a retractor with wrist-locking handles for secure and stable patient setup

Salient features:

- ✓ Retractors adjustments with hasp locking system
- ✓ Indexable on a variety of couch tops
- ✓ Maximum weight-bearing capacity
- ✓ Quick setup by fixing on suitable indexing bar
- ✓ Retraction provides maximum stiffness
