## 1 INTENDED USE AND INDICATIONS FOR USE

#### 1.1 INTENDED USE

Head & Shoulder mask is to immobilize and position the patient's head, neck & shoulder region with precision during treatment sessions.

#### 1.2 INDICATION FOR USE

Head and shoulder masks are similar to head and neck masks but extend further down to cover the shoulders. They are used in cases where shoulder immobilization is necessary. These masks are custom-made for each patient by softening the mask material and then molding it to conform tightly to the contours of the head, face, and neck

# 2 PRODUCT OVERVIEW

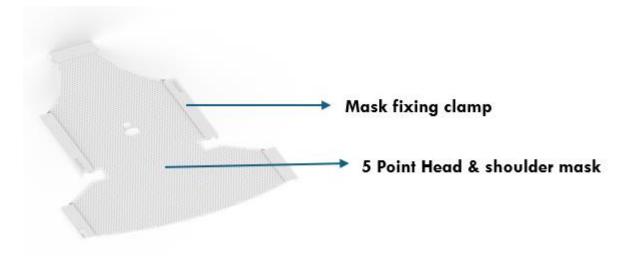

Figure 1 Head and shoulder mask

- Inspect the mask thoroughly before use. Do not use the mask if damaged.
- Store each thermoplastic mask in the order of patient ID labelled

# 3 MOULDING INSTRUCTIONS

• Thermoplastic masks require heating time in the water bath or in convection oven. The appropriate times and temperatures are presented in the table below.

DESCRIPTION	In WATERBATH	In CONVECTION OVEN
2.4 mm thickness Time of immersion/heating	~8 - 10min	~4 -5 mins
3.2 mm thickness Time of immersion/heating	~10-12 Mins	~10-15 mins
Temperature	Max 70°C	Max 70°C

**Note:** The above-mentioned timings are specific to the PMT make water bath and convection oven and may vary depending on the different make

- Ensure that the material has turned completely from solid state to translucent before removing it from the water bath or convection oven.
- After heating, dry the mask with a towel to remove excess moisture.
- Before applying the mask to the patient's skin, need to ensure that the temperature of the mask is not too hot to avoid burning or discomfort the patient's skin
- Position the mask above the patient face (head, neck & shoulder)
- Position the mask clamp over the locking gap
- Once the mask clamp is positioned over the locking gap, fix it by using a mask locking cushions
- Carefully pull the Profiles towards the baseplate so that the mask forms around the patients' face.
- Mould the mask precisely around the nose bridge, chin, and eye sockets of the patient.

### 4 TECHNICAL DETAILS

1	Material used	Thermoplastic
2	Mask thickness	2.4mm & 3.2mm

# 5 CLEANING, STORAGE AND DISPOSAL

- Avoid storing under the sunshine and in warm and wet environment
- Store each thermoplastic mask in the order of patient ID labelled and masks can be reused for the next fraction of treatment for the same patient.
- The decision to reuse the mask should be based on the treatment plan and cycle
- The product can be disposed of with dry waste
- Inspect the Mask regularly, to check for any damages or worn or to do replacement
