

Convection Oven C037-00

IMPACT convection oven quickly reaches working temperatures and offers an easy-to-use method for heating thermoplastic masks. It offers quick and uniform softening of thermoplastic materials. The digital display includes a countdown timer and adjustable time/temperature, allowing for precise heating. The start/stop function enables preheating while preparing the patient. The oven includes non-stick telescopic sliding rack for easy cleaning and mask removal.

Salient features:

- ✓ Made of stainless steel material
