

Pediatric Headrest PDH35-00

IMPACT headrests provide the utmost support, accuracy, and repositioning to the head and neck region. The specially designed shape of Impact headrests are compatible with the patient head allowing complete support and comfort at every stage of treatment. Panacea offers a dedicated Pediatric Headrest designed to support the infants and young children supine radiotherapy positioning.

The Pediatric Headrest is specially designed to meet the unique anatomical and comfort needs of pediatric patients undergoing radiotherapy. With a focus on gentle support, precise positioning, and enhanced comfort, this headrest helps reduce patient anxiety and movement during treatment, ensuring consistent and accurate radiation delivery.
