

Head Wedges

Wedges with varied angles are used to fine-tune head tilt during brain or head-and-neck (H&N) treatments. It enables proper neck extension or flexion, enhancing comfort while ensuring consistent, reproducible head alignment across treatment sessions. It provides both rigidity and optimal patient comfort.

Salient features:

- ✓ Maximum radiolucent competence
- ✓ Proficient daily reproducibility
- ✓ Lightweight
- ✓ Compatible with head & shoulder base plate, Sigma lite board, sigma board
